

## Event Vithoukas Brazil 2020

March 21<sup>st</sup> and 22<sup>nd</sup> 2020

To begin the education on classical homeopathy for the students from Brazil, this first webinar international was planned as an intense two-day learning experience.

The webinar began with a wonderful video about the E-Learning course of IACH, a course regarded as the most rigorous and efficient education program in homeopathy; a course that is accredited by many medical universities all over the world. This set the tone of in-depth scientific learning for the next two days.

**The first** lecture was by Dr Seema Mahesh, the research head of IACH who explained the need for evidence-based medicine in homeopathy. The conventional medical world is ridiculing homeopathy for lack of evidence while the truth is not absence of evidence but absence of structure to the method in which this evidence is collected/ investigated/ presented. Her talk provoked the participants to think on the lines of documentation of cases in the right manner and how to change the bigger picture of homeopathic research in the world today.

This was followed by demonstration of dengue cases by Dr Mahesh Mallappa, teacher of IACH. Many myths surround epidemic diseases in homeopathy and his explanation went a long way in clarifying these. He showed the possibilities with homeopathy even in severe cases of dengue where the platelets were very low and the other markers were dire. He demonstrated that the idea behind such success is individualization and generalized remedies do not work.

**The next day** started with a very important concept, formed by Prof George Vithoukas, based on his rich clinical practice – The Levels Of Health. This session was taught by Dr Seema Mahesh, who explained the basic idea of this theory and the clinical application of the same. The levels of health is an extremely practical concept which will clarify a homeopath's understanding of any given case so he may prescribe and interpret the results with precision.

Dr Mahesh followed this session with a complex case of epilepsy that depicted the necessary analysis in such cases and through follow ups exhibited shift of levels. In homeopathy, mere removal of symptoms cannot be regarded as cure in chronic diseases. We need to see proof of cure in the form of shift of the level to a higher, healthier one. This case exemplified such a shift for all the attendees to learn from

Then came the moment everyone was waiting for – The session of Prof Vithoukas. He answered to the burning questions of today regarding the COVID 19 and homeopathic possibilities in this pandemic. The participants never wanted his session to end with such profound wisdom and learning that was coming their way. There were many more questions which the attendees wanted to ask but time wasn't their friend. The day ended with a feeling of accomplishment and a hope for more such webinars and learning opportunities in the future for the Brazilian homeopaths.

After the session and impactful speech of Professor Vithoukas, Betânia Tristão made a quick presentation of the online courses, Seminars in Alonissos, books and talked about the IACH promotional offer for all participants. By the end of the presentation, Betânia made herself available if the participants had any doubts.

The event had many participants including medical doctors, veterinaries, homeopaths, psychologists, agronomists and biologists.

This event was held by Homeosapiens and with all the support from International Academy of Classical Homeopathy.

New events are coming soon!

### **Comments on Vithoukas Event Brazil -2020**

Excellent event. Reflection, reflection.

Sympathetic, secure and competent teachers.

Much important information was passed to us. Pure homeopathy to make us ponder and keep ourselves on the right way.

Congratulations, and thank you very much.

P.R.S.C

Hello Betânia, Maria and IACH team.

Firstly, I want to thank you for your work. I imagine how much study and effort behind it so we can sit and enjoy so much knowledge with such quality!

My name is L.S. This was my first webinar with you. I was very pleased with the quality of Doctor Seema's and Doctor Mahesh's lectures, and watching Professor Vithoukas live was incredible! I have been struggling to be his student since December!

I was especially happy about Professor's frankness when talking about what he really believes that is going on. Among many doubts, I still cannot understand why or in which sense he would change the LOH theory.

L.S.

-----

Congratulations, once more, for the event. It was very nice, Mahesh's and Seema's didactic was great.

I want to express my gratitude for you making this webinar happen.

I really liked participating and it seems that who attended it also liked it.

I believe we could have more of that, with specific topics. E.g. cases with the study of the repertory's rubrics and their graduation.

H.G.

Hello, I am P.R. and I would like to say that I found our webinar excellent!

Very clarifying, with really important topics of homeopathy, especially of the present time!

To Dr. Mahesh and Dr. Seema, my thanks for all enlightenment of study and practice, and confirmation!

To our dear Master Professor Vithoukas, with his wise words of knowledge along homeopathy, and especially for his explanation about this big pandemic that affects the world... thank you so much!

I thank Homeosapiens and take the opportunity to congratulate for the initiative and success of the webinar.

To the dear translators Nathalia and Juliana who were of great help in this course.

Thank you very much Maria Chorianopoulou for the opportunity... it was excellent!!

My affection to the International Academy of Classical Homeopathy of Alonissos!

Regards,

P.R.
